Program GMP+ International

Background

This year marks 25 years since a Good Manufacturing Practice (GMP) code for animal feed was created. The scheme evolved throughout the years to what GMP+ Feed Safety Assurance is today. GMP+ International would like to mark this anniversary with an exploration of the future of feed safety, and invites you to an inspiring, exclusive conference “**Feed safety: from control to responsible chain management**”.

Audience

Senior & end decision makers in the food & feed industry are invited to register.
